Date: April 10, 2008

Company: Rapid Reel®

Product(s): 100- and 200-foot Pivot Hose Reels

Product Description: The dependable Air Hose Reel from Rapid Reel® delivers durable, low-maintenance hose use along the mounted surface. Its break-resistant crank handle has a distinctive comfort grip designed to spin freely on the hose's steel shaft, making rewinding an effortless task.

The Rapid Reel® 150-foot Air Hose Reel has been innovatively designed to mount easily. A built-in, steel base plate makes installation simple. The four mounting holes are three-and-three-eighths-inches from center to center.

Pressed between the reel and the axle, the Air Hose Reel's durable axle bushings will keep the reel spinning smoothly for years. The innovative method of securing the hose to the reel extends the life of both the hose and reel by protecting the swivel and hose fittings from hard pulls. The Rapid Reel® Air Hose Reel is backed by a 3-year warranty.

Construction managers, site operation managers, retail garden center managers, greenhouse and nursery growers, professional landscape professionals, homeowners, gardeners, and others can learn more about Rapid Reel® and the Pivoting Power Wash Reel at www.rapidreel.com or by calling 866-523-2363.

More about Rapid Reel®:

Rapid Reel® is a family-owned business and manufacturer of low-maintenance, top-quality, durable hose reels for various industrial and consumer usages. Founded by John Eley and his three sons in their rural Nebraska farming community of Orchard in 1989, the company's roots run deep in Midwestern virtues: the meaning of hard work and the value of quality tools, equipment and service. Rapid Reel® develops hose reels that are built to last while remaining committed to craftsmanship, customer service, and production of the most resilient reels in the industry. Constructed with durable materials and classic form-follows-function design, these reels have the distinct advantage of being the choice of homeowners and professionals who demand a higher standard of quality from their outdoor tools and equipment.
