

Instructions for Replacing Swivel/Hose Assemblies

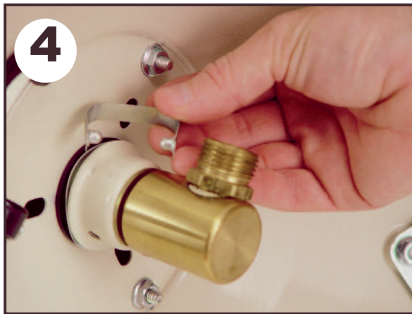

1 Shut off water and remove inlet hose from spigot.

2 If needed, remove reel from mounting plate or cart.

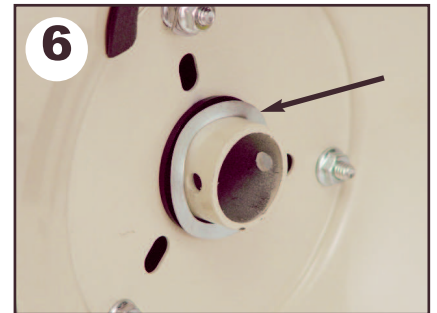

3 Using either a finger or screwdriver, release the "snap button".

4 Remove snap button.

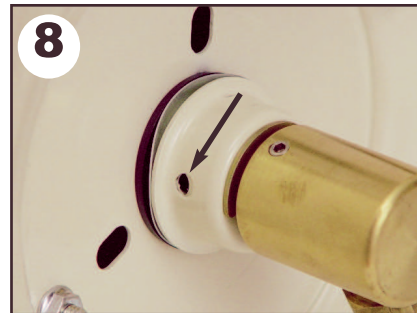

5 Pull inlet hose out through the reel axle.

6 Make sure "wavy washer" remains on the reel axle.

7 Push new hose & swivel assembly through reel axle.

8 Align holes on reel axle with the holes in the bell cap.

9 Push snap button onto bell cap.

10 Secure new assembly to the reel by firmly pushing the "tabs" of the snap button into the holes.
